CUSTOMER INVOICE PORTAL

Customer Invoice Portal provides online invoice presentment and processing to Acumatica Cloud ERP

FUNCTION

Customer Invoice Portal, powered by Invoice Ninja provides electronic invoicing presentment and processing with a secure, PCI-compliant, web-based infrastructure branded for each billing entity.

IMPACT

With *Customer Invoice Portal,* billers save money and speed up cash flow by seamlessly and securely moving from paper invoices and checks to electronics bills and payments.
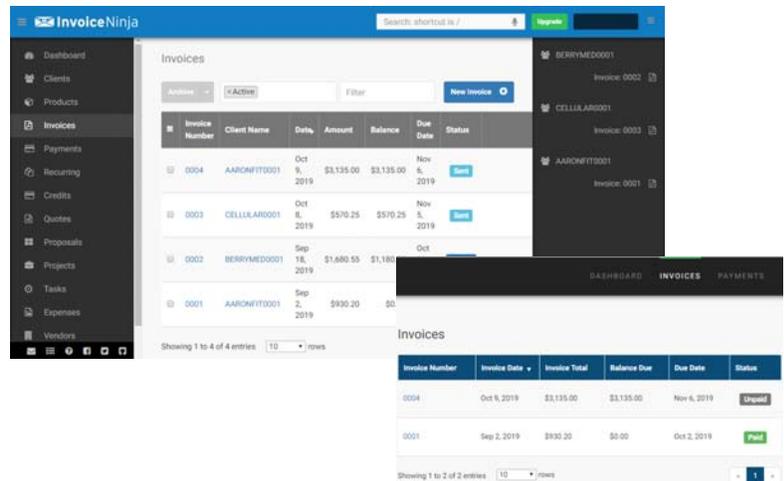

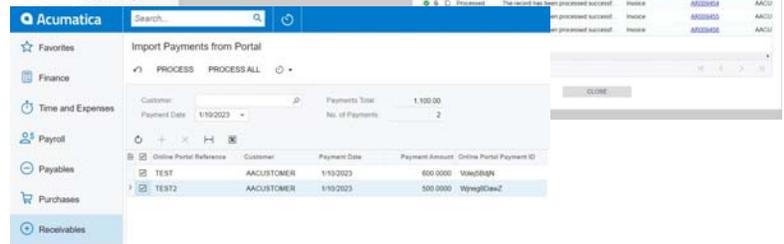

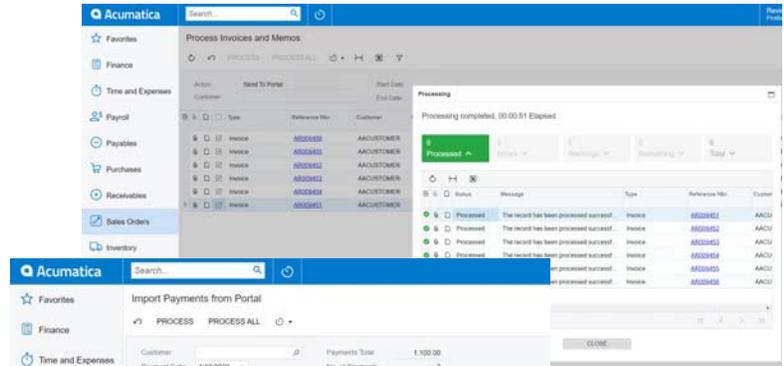

FEATURES

- Full integration with Acumatica Cloud ERP sales order processing and accounts receivable
- Customizable payment options including minimum, full, and over payment capability
- Communication of reminders, late notices, rate changes, and other important information
- Presents invoices to customers in a branded portal

Customer Portal Features:

- Pay invoices online with a variety of remittance types, including credit cards
- Flexible payment methods including scheduled and auto-payment
- See all their transactions with you in one glance
- View all previous and upcoming payments and have easy access to quotes and other account details
- Download or print any aspect of their account with you directly from the portal

Contact your Acumatica Cloud ERP partner and discover how *Customer Invoice Portal,* can work for your organization.
