## What Clients Are Saying About Inova

"The connection between Inova and Acumatica has significantly improved our general ledger reporting and our direct labor visibility. We're now able to break down hours and units by project, by job, and all that has proven big dividends for our operations guys and allowed them the ability to get more detailed on what projects we want to keep and what projects we may need some additional billing on."

**David F., CFO at Green Garden Group**

"We switched to Inova from ADP at the start of the new year 2023. What a difference. The customer service is excellent at Inova. The setup team answered any questions and walked us through each step. Could not be happier we made the switch."

**Suzanne F., Manager, HR at Fazio's Bakery**
