

The Mobile Suite for Acumatica

Suite Positioning for Executive Leaders

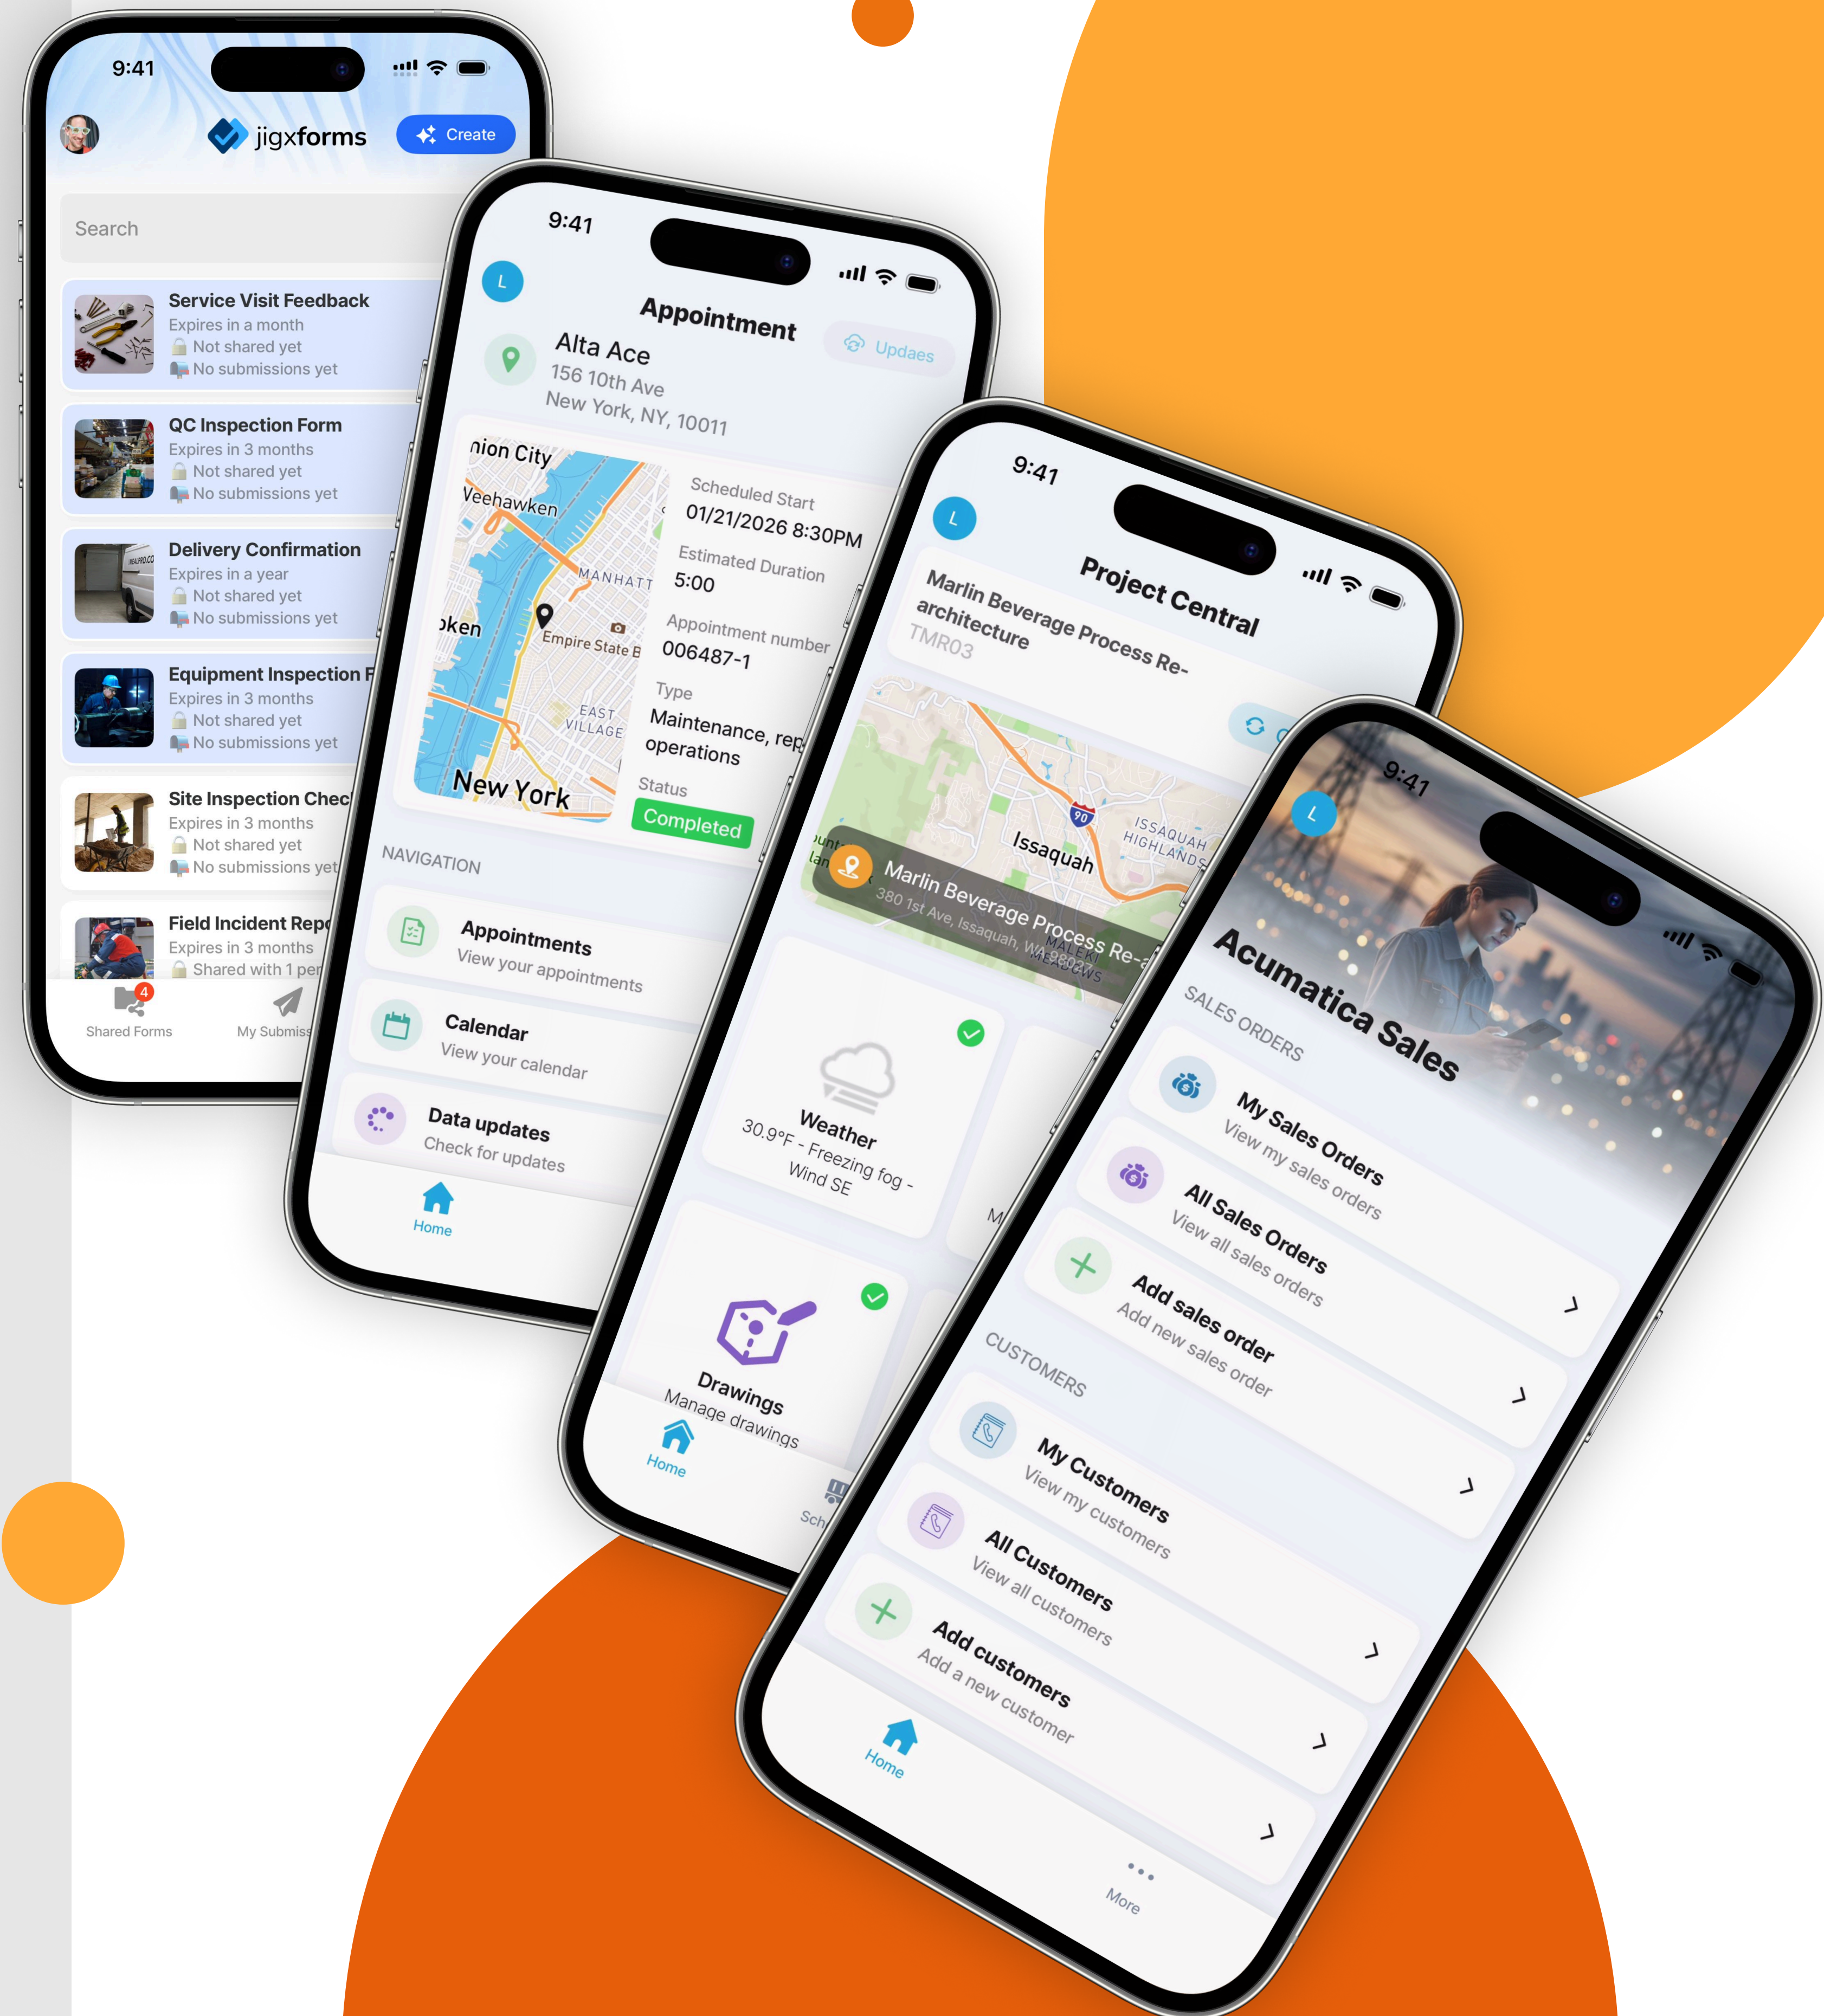

Jigx is the mobile execution layer for Acumatica. Through the JigxFrontline app, Jigx transforms ERP data into real-time, frontline action, connecting technicians, sales teams, project managers, and operational leaders through secure, native mobile apps. Designed for scalability and enterprise control, the Jigx Suite reduces administrative overhead, accelerates revenue cycles, improves project margin visibility, and increases workforce productivity, all while maintaining direct, secure integration with Acumatica ERP.

Enterprise Value Drivers

- Accelerate order-to-cash and billing cycles
- Increase field productivity with offline-first mobility
- Improve financial control and project margin visibility
- Eliminate manual re-entry and reduce ERP friction
- Enable scalable digital transformation without custom development

Architecture Snapshot

- Mobile Devices → Jigx Secure Platform → Acumatica ERP Native mobile apps.
- Secure authentication. Role-based access. Encrypted synchronization.
