

JigxFrontline for Field Services

JigxFrontline for Field Services extends the power of Acumatica ERP directly to your frontline teams.

Designed specifically for Acumatica users, this native mobile app enables technicians and service teams to manage appointments, capture time and expenses, generate invoices, and process payments, all fully integrated and fully offline.

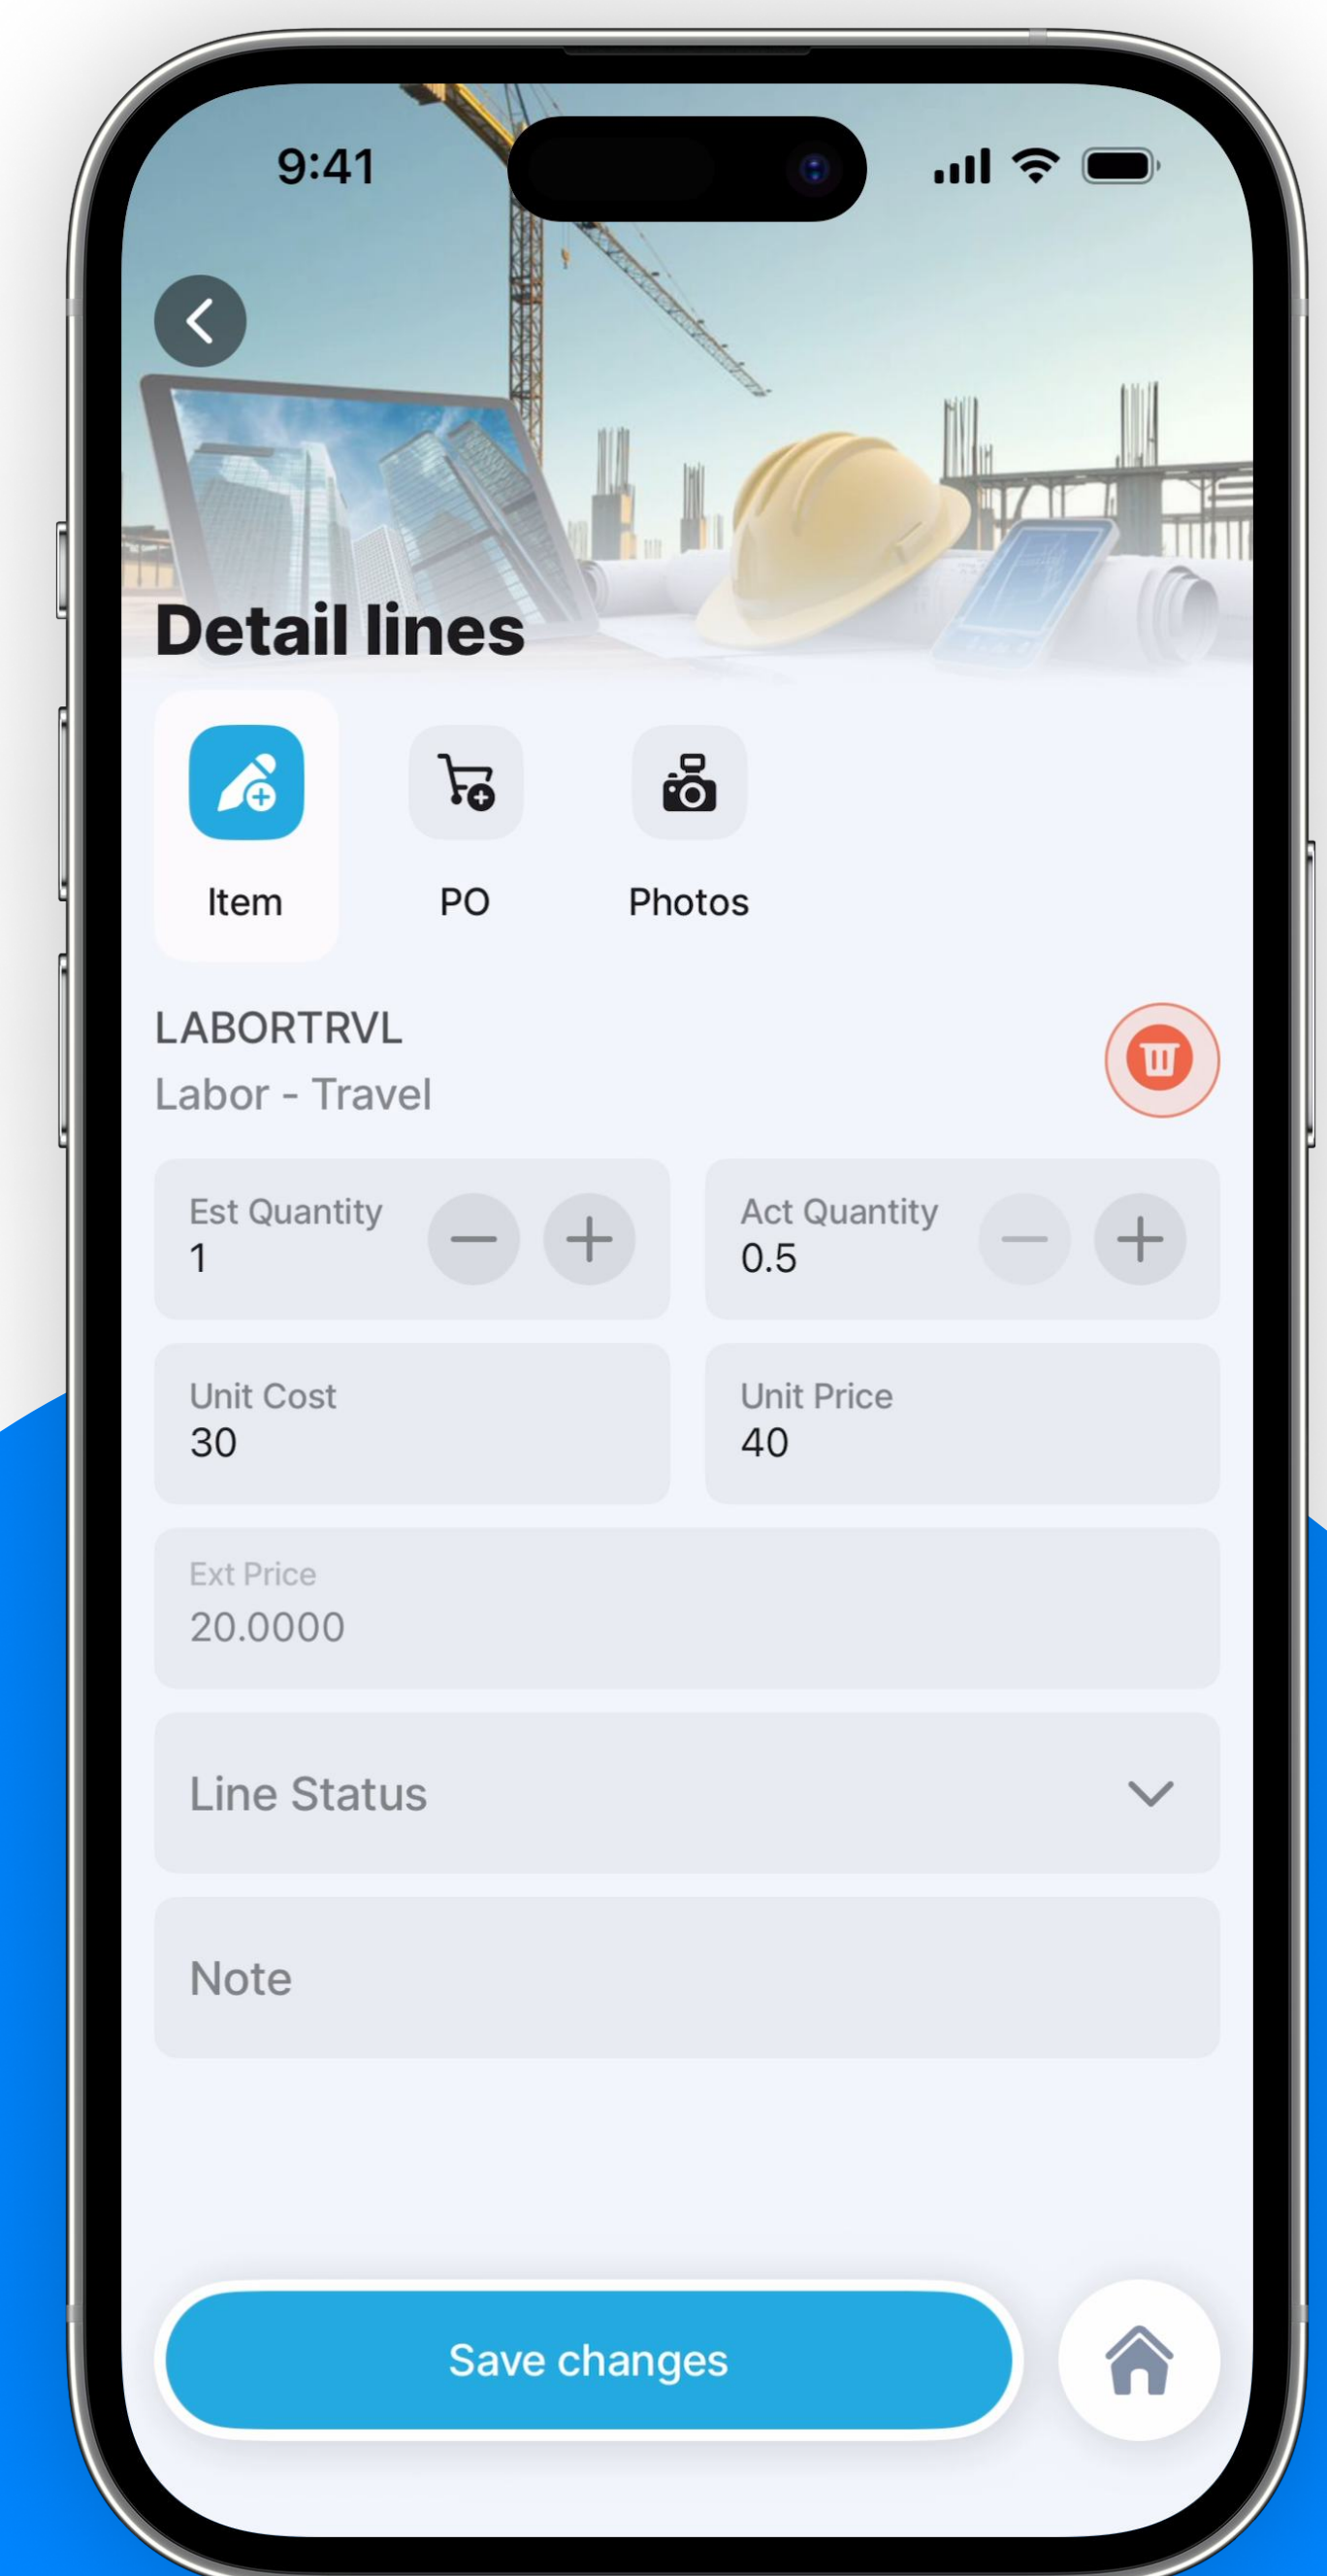

Core Capabilities

- Appointment Management – View, update, and complete service appointments
- Time Tracking – Start/stop logs and service-based time entries synced to Acumatica
- Expense Capture – Log and attach receipts directly to service records
- Materials & Inventory – Real-time visibility into stock and non-stock items
- Customer Signoff – Secure digital signature capture onsite
- Onsite Invoicing & Payments – Generate PDF invoices and accept multiple payment methods

Business Impact

- Reduce administrative rework and double entry
- Accelerate invoice turnaround
- Improve technician accountability
- Increase frontline productivity
- Enhance customer satisfaction

Why JigxFrontline for Acumatica?

- ✓ Native iOS and Android mobile experience purpose-built for field use
- ✓ Offline-first architecture with automatic ERP synchronization
- ✓ Secure read/write integration with Acumatica
- ✓ Improved billing speed and cash flow acceleration
- ✓ Real-time operational visibility for back-office teams
