

JigxFrontline for Field Sales

JigxFrontline for Field Sales extends Acumatica ERP directly to your sales team's mobile devices.

Create orders, manage customers, generate invoices, and capture payments, fully integrated and fully offline.

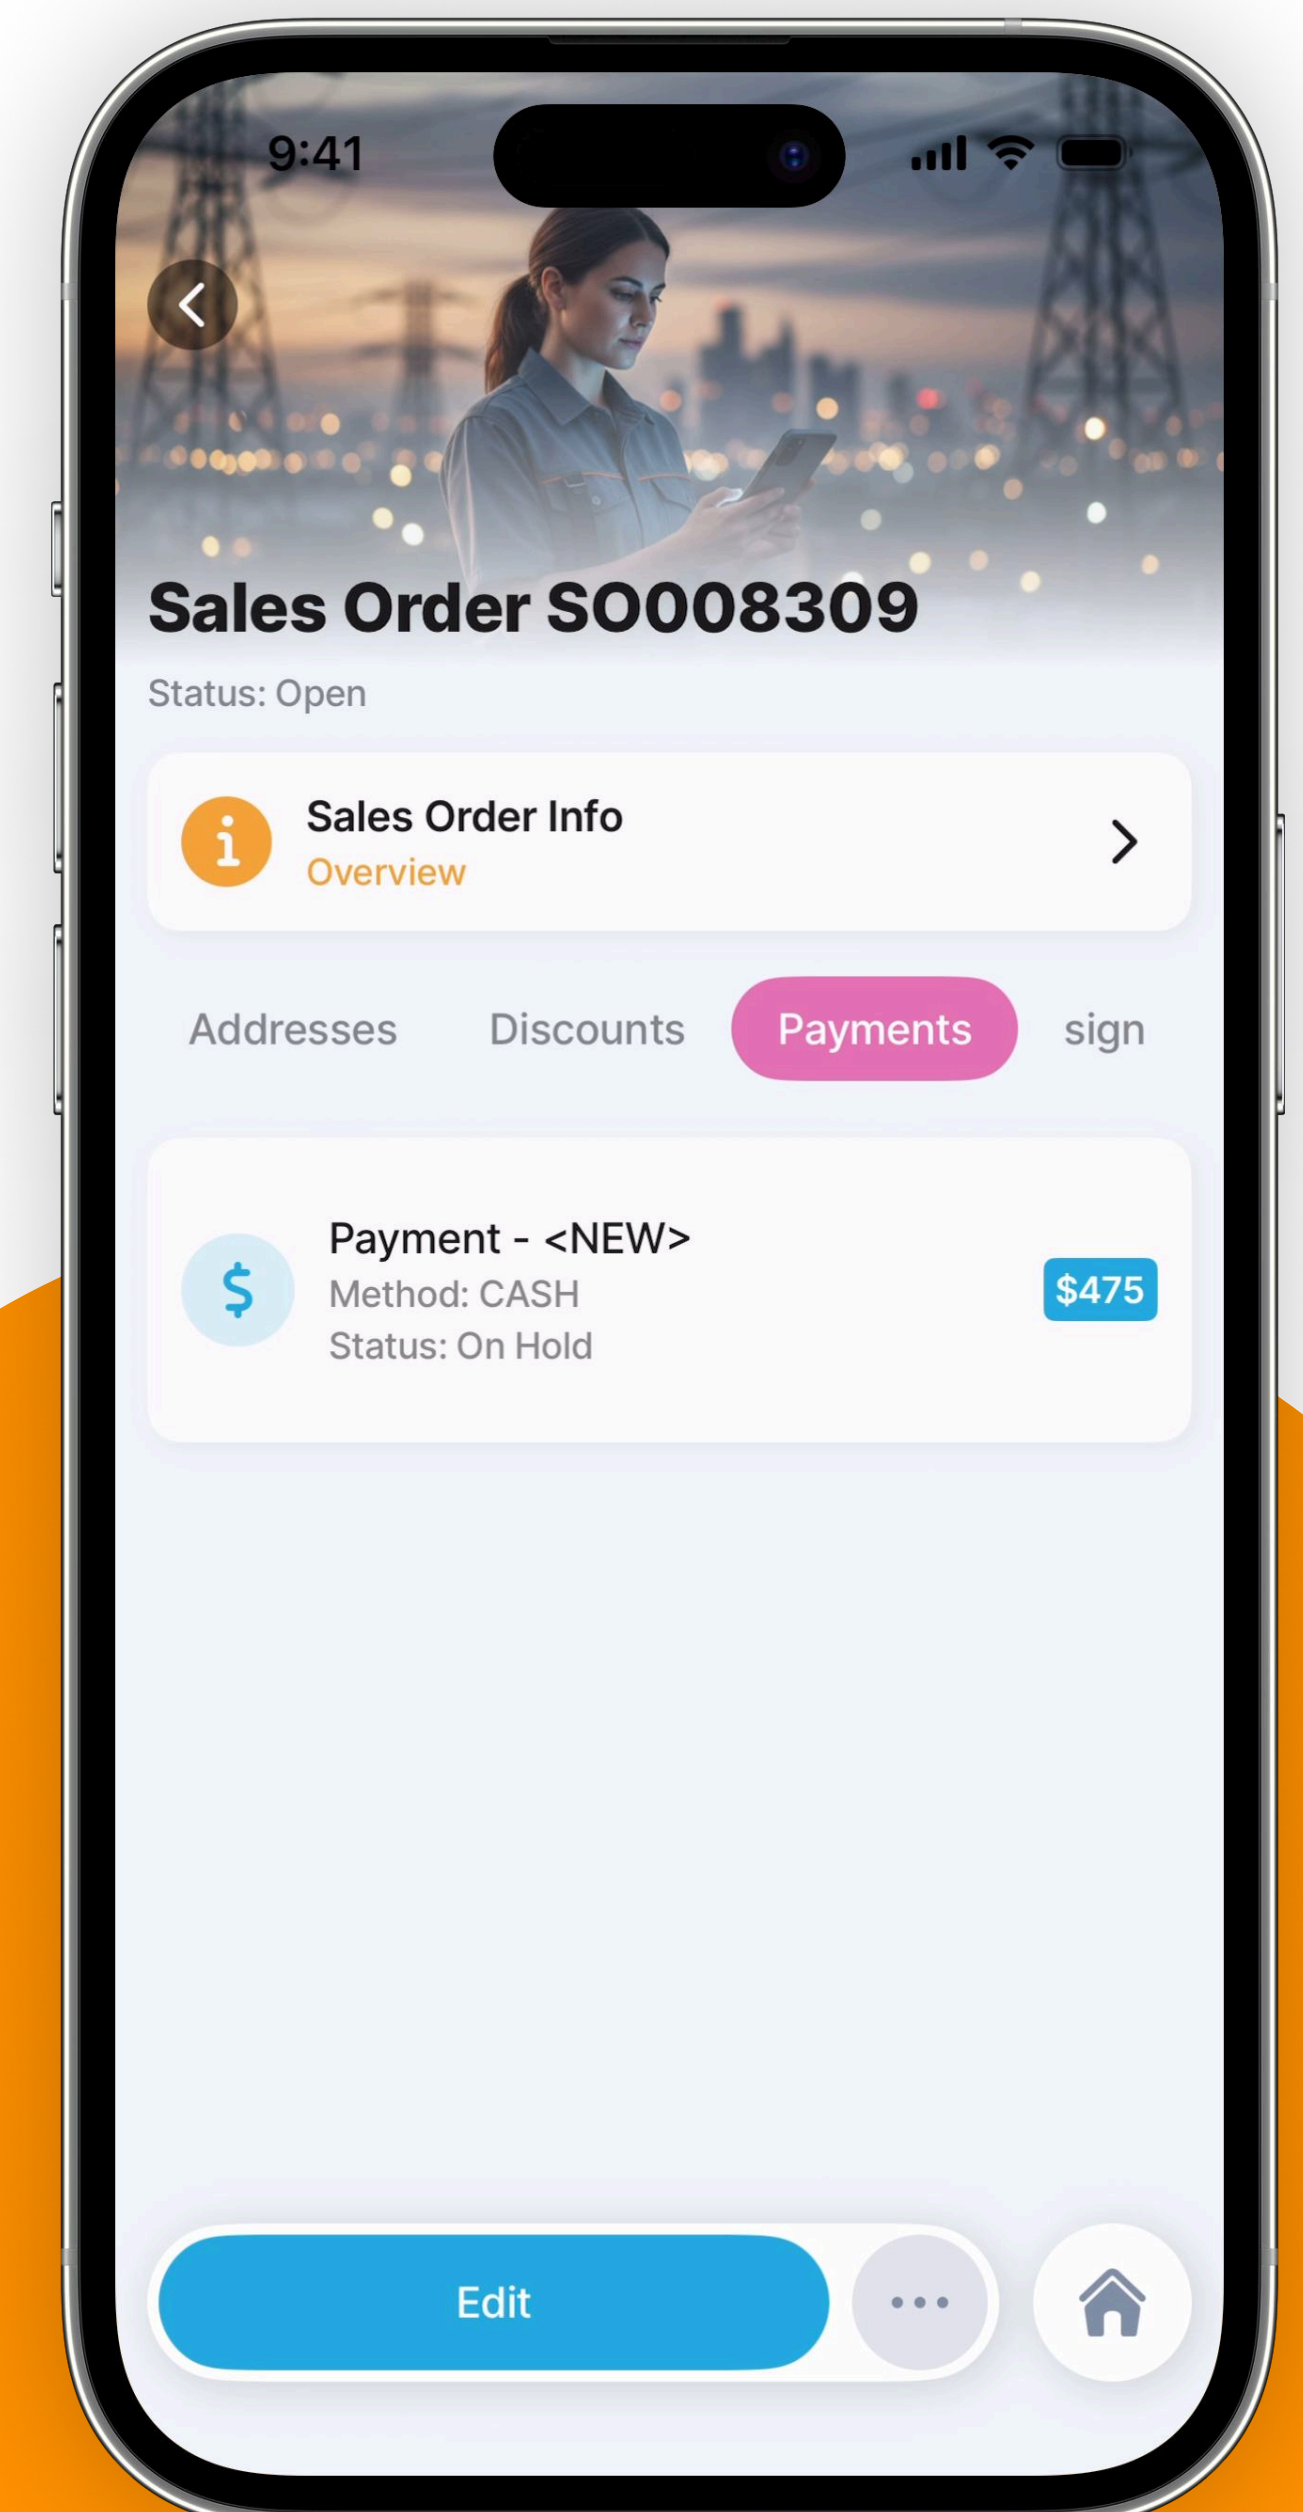

Core Capabilities

- Create sales orders and credit memos onsite
- Add new customers instantly from the field
- Live inventory visibility and real-time pricing
- Flexible discounts at line and order level
- Capture digital customer signoff
- Generate PDF invoices and accept multiple payment methods

Business Impact

- Accelerate order-to-cash cycles
- Increase sales productivity in the field
- Improve customer experience with instant confirmations
- Enable real-time decision-making
- Drive higher revenue per visit

Why JigxFrontline for Acumatica?

- ✓ Native iOS and Android mobile experience
- ✓ Offline-first architecture with secure synchronization
- ✓ Immediate order processing and faster revenue capture
- ✓ Improved sales visibility for management
- ✓ Reduced administrative double entry
