

JigxFrontline for Project Central

JigxFrontline for Project Central extends Acumatica Project Management to the field.

Give project teams real-time mobile access to drawings, photos, schedules, and notes. Fully integrated and fully offline.

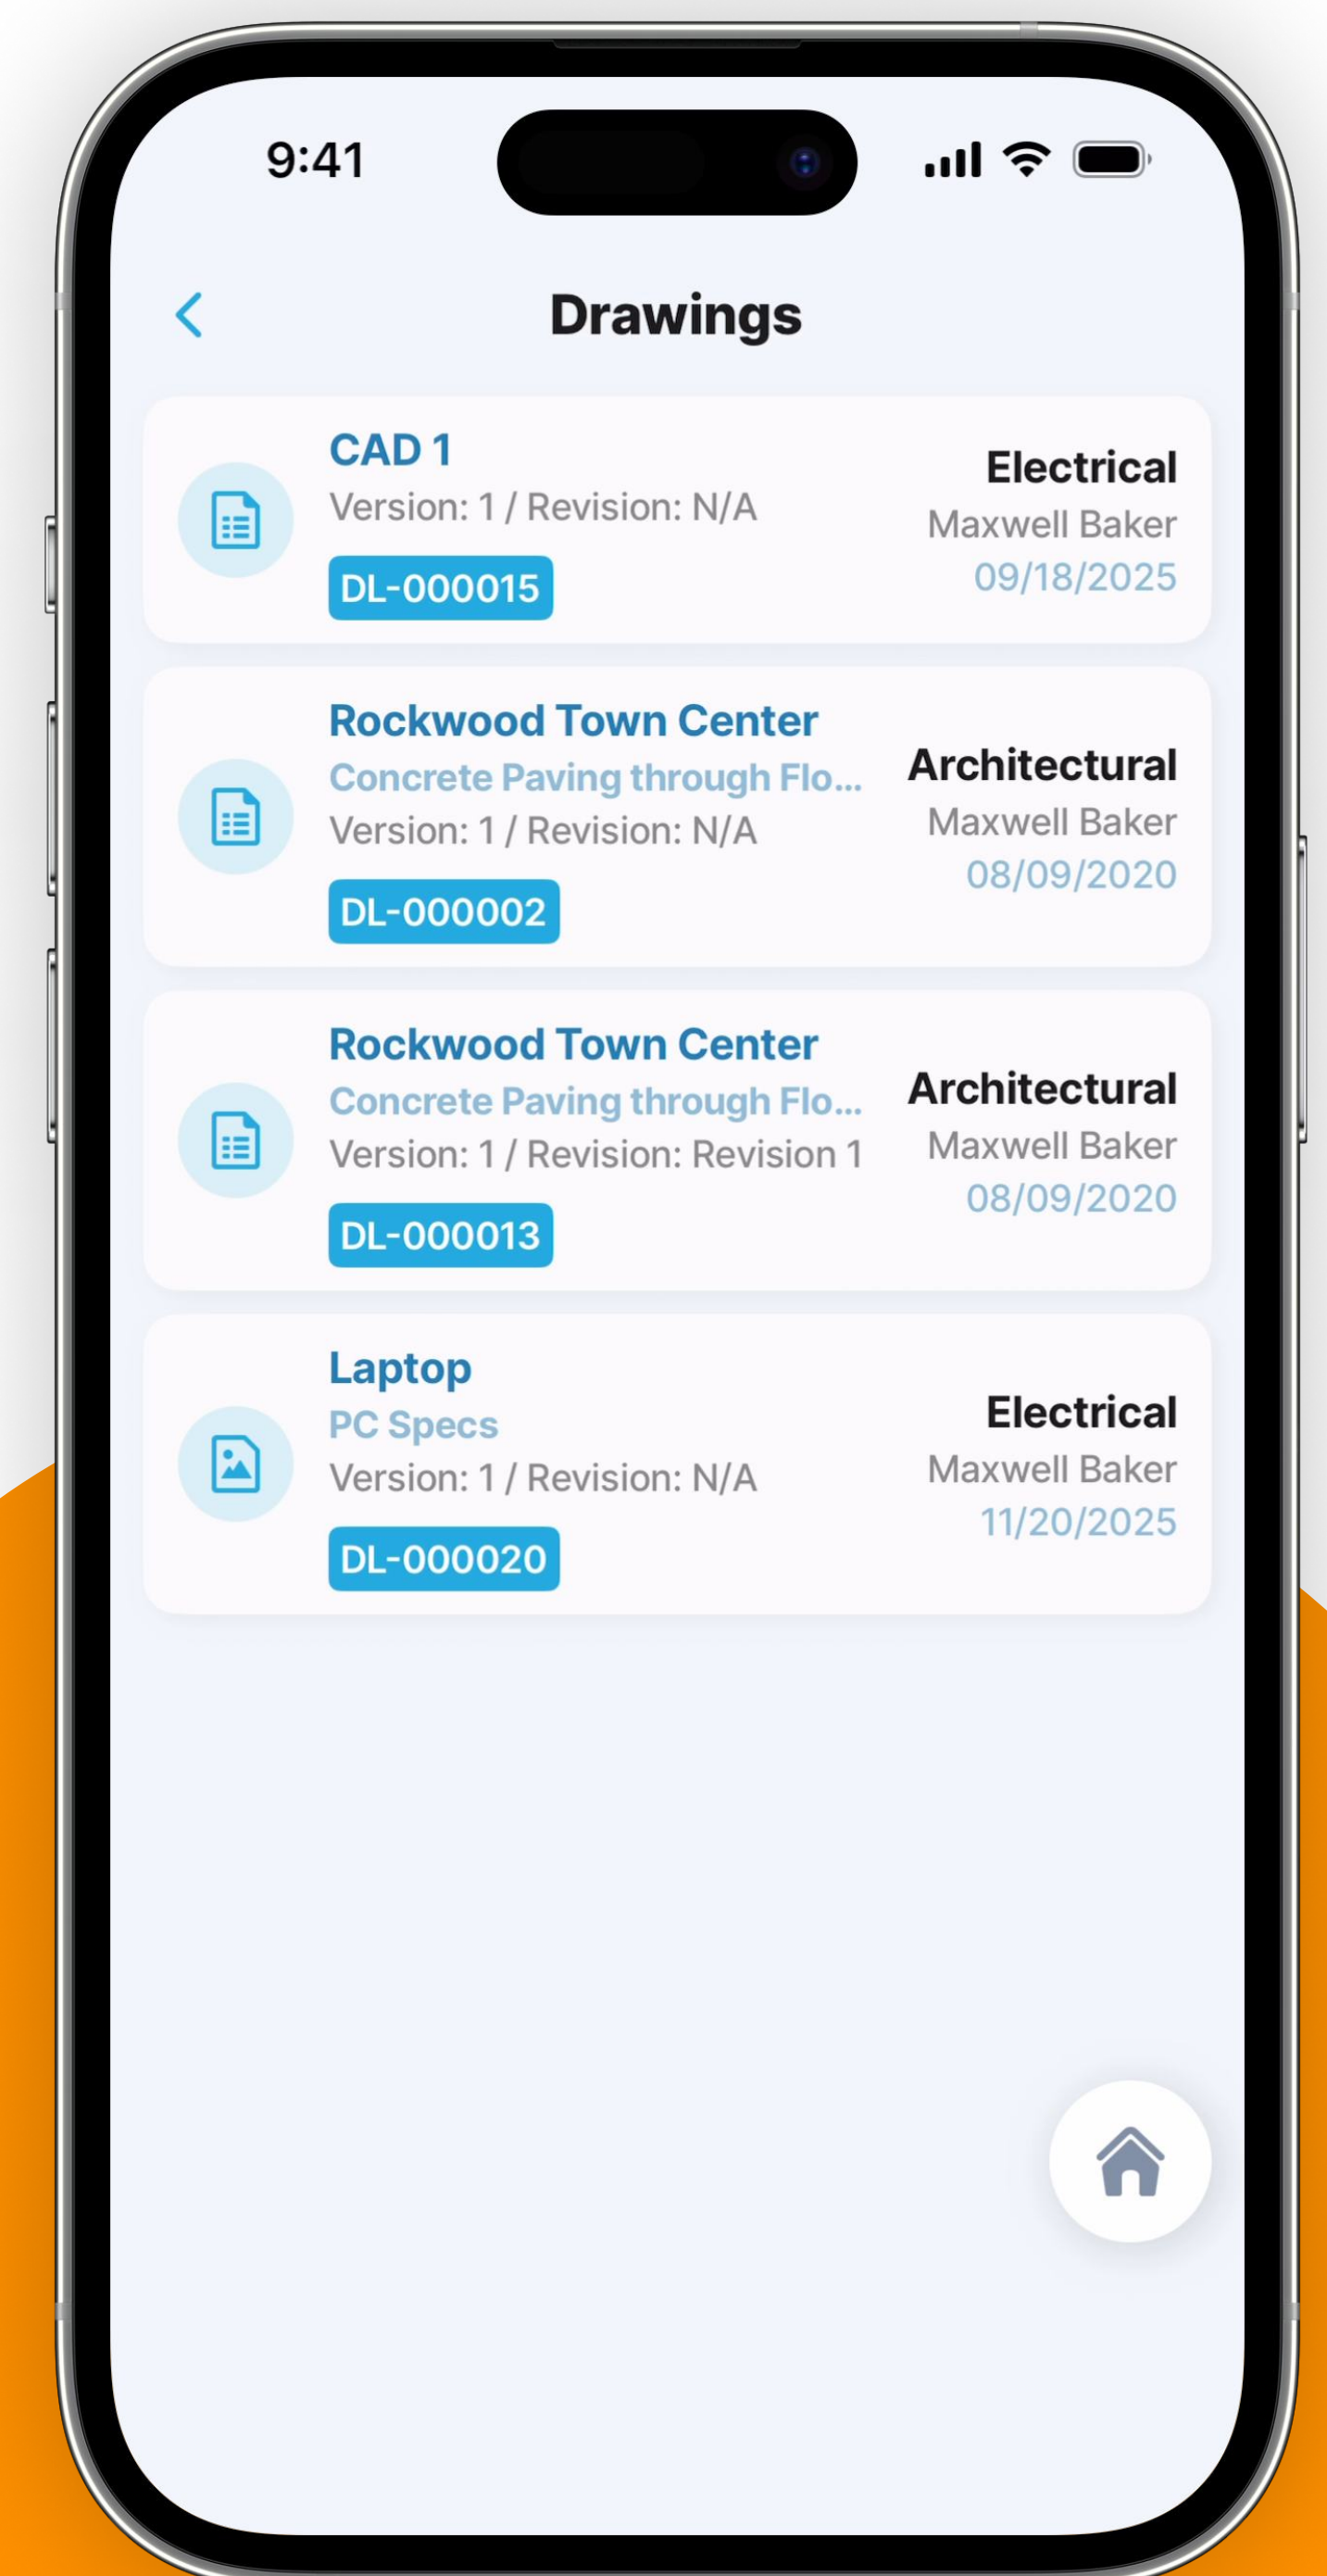

Core Capabilities

- Access project drawings, photos, notes, and schedules
- Capture site photos and documents
- Update project progress in real time
- Continue working offline

Business Impact

- Improve project margin control
- Reduce reporting delays
- Increase team accountability
- Enhance collaboration
- Minimize manual reconciliation

Why JigxFrontline for Acumatica?

- ✓ Native iOS and Android mobile experience
- ✓ Offline-first architecture first
- ✓ Direct integration with Acumatica Project Management
- ✓ Improved cost control and visibility
- ✓ Faster decision-making from the field
