

Tipalti ERP Integration

Seamless Global AP integration with your ERP and Accounting system

Maximize Your ERP Investment with Integrated Accounts Payable Automation

Your ERP system is one of your most valuable business investments. But ERPs are not designed for in-depth payables execution and process-heavy operations like Accounts Payable (AP), and as a result, AP is often backfilled with staff. Conquering the last mile of ERP from a payables perspective takes a holistic, future-focused approach. The payables process is a dozen different processes interdependent on each other. Rather than continuing to piece together one widget or tool – only to have to deal with replacing it later – finance operations need to strive for self-contained solutions that work cohesively. Payables departments need to have an integrated philosophy that encompasses the entire end-to-end process.

According to the Institute of Finance & Management (IOFM), integrating AP solutions with ERP systems lets organizations achieve true end-to-end automation by validating invoices against ERP supplier information, ensuring that general ledger coding syncs with the ERP and ensuring correct invoice and payments posting for faster financial close.

Why Consider Tipalti

Tipalti, a leader in Global Accounts Payable (AP) and Payment Automation for hyper growth companies has expanded its integration capabilities to help more mid-market businesses automate their AP processes. The new capability adds any Enterprise Resource Planning (ERP) solution that can integrate with Tipalti's AP Automation solution. This opens up scalable, global and modern AP automation capabilities to a much larger segment of the fast-growing mid-market businesses. Tipalti's best-in-class AP automation solution is ideal if you are looking to scale your high-velocity growth company, eliminate manual and inefficient payables processes, take a more global approach to paying suppliers, vendors, and partners, and simply eliminating payables workload.

Tipalti offers seamless integrations with wide range of ERPs ensuring payables information is up-to-date. We integrate with almost every ERP, including **Dynamics GP, Dynamics NAV, Dynamics 365 Business Central/NAV, QuickBooks Desktop, Sage 100, Sage 300, Sage 50, Xero, SAP B1/Business One, SAP Business ByDesign, Acumatica, Epicor, and more.**
