Introducing Tipalti AI

✦ Tipalti AI

In the rapidly advancing realm of AI, Tipalti AI offers an innovative solution for streamlining and automating laborious finance operations processes. With accounts payable being the most time-consuming finance function, according to IOFM, the need for a more efficient approach is evident.

Tipalti AI tackles tasks like data entry, invoice coding, PO-matching, tracking approvals, resolving discrepancies, and spreadsheet-based analysis, freeing up significant time and resources for your finance team and significantly reducing the risk of errors and delays.

Key Features

Smart Scan
Offers rapid invoice extraction with self-learning, AI-enhanced OCR, adapting to invoice variations and intricate table data for accurate extraction.

Duplicate Bill Detection
Proactively identifies and flags duplicate invoices, enhancing payment accuracy and preventing costly payment errors.

GL & Custom Fields Auto Coding
Auto-populates line-level expense accounts for invoices, saving up to 40% of processing time and enhancing spend visibility.

Intelligent Approval Routing
Uses AI to predict approval chains based on historical invoices and company-specific rules, effectively distributing invoices to the right person or sequence.

Auto-Generate Purchase Request
COMING SOON
Enables employees to quickly create purchase requests by entering free text; the system can efficiently generate requests with just a few key phrases.

Smart Reports Builder
COMING SOON
Streamlines reporting with an AI-enabled free-text input system for instant and accurate report generation.

Smart PO-Matching
COMING SOON
Offers automated 2-way and 3-way matching between POs, invoices, and receiving reports on header and line levels, reducing manual work.

AI-powered Chat
COMING SOON
An AI-driven digital assistant powered by ChatGPT, providing instant access to critical business information and answers to complex business-related questions.

> We currently have 10 subsidiaries and having AI to identify the correct sub has been huge to reduce manual work of corrections. There was minimal training required across the company and it helps us reduce time on manual tasks and focus on other initiatives required by the company.
