

Print Management + eDelivery | Document Archiving | Document Workflow | Image Management

Browser-Based Interface

Save money on IT infrastructure costs with UnForm's fully browser-based application.

- Easy, low-cost deployment
- No software installations
- Access any time, from any location

Intelligent Document Capture

Save time with UnForm's automatic upload and identification of documents from designated inbound sources.

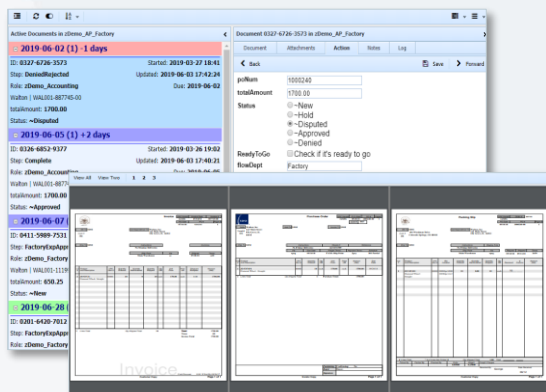

- Monitor email mailboxes
- Monitor directory locations
- Detection logic applied for automatic classification of documents
- Drag & drop

Enhanced Data Extraction

Eliminate costly errors from manually keying data.

- Extract data from PDF text layers
- Zoned barcode recognition
- Full text OCR
- Identifies duplicate entries
- Mathematical data calculation
- Lookup data via ODBC, API or REST calls
- Validate extracted data against ERP system

Automate Processes & Data Entry

Increase operational efficiency by eliminating manual data entry of transactions into your ERP system. Employees can instead focus on cost-saving and revenue-generating activities.

- Create .XML, .CSV or EDI data files to automate data entry
- Present for approval using UnForm DocFlow
